

# BRINGING THE MARITIME SECTOR INTO THE DIGITAL AGE

EfficienSea2 Conference, 8-9 November 2016

Francis ZACHARIAE  
Secretary-General, IALA

# Horizon 2020

The EU Framework Programme for Research and Innovation

Horizon 2020 is the biggest EU Research and Innovation programme ever with nearly €80 billion of funding available over 7 years (2014 to 2020) – in addition to the private investment that this money will attract. It promises more breakthroughs, discoveries and world-firsts by taking great ideas from the lab to the market

# EfficienSea2

Getting Connected

Co-creation and deploy innovative and smart solutions for efficient, safe and sustainable traffic at sea

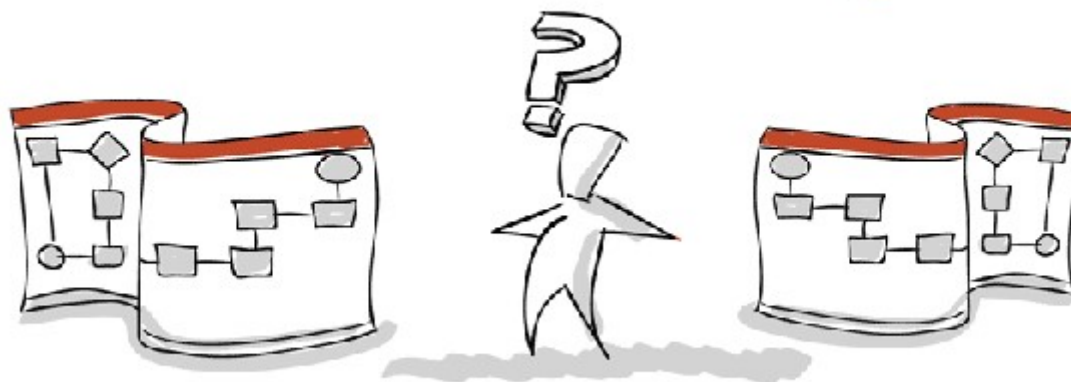

## EfficienSea2 – from project to process

A “project” has a beginning and an end (although the beginning and end may not be well-defined when the project starts and the end might be a long time in the future).

A “process” is generally ongoing and doesn’t normally have an end.

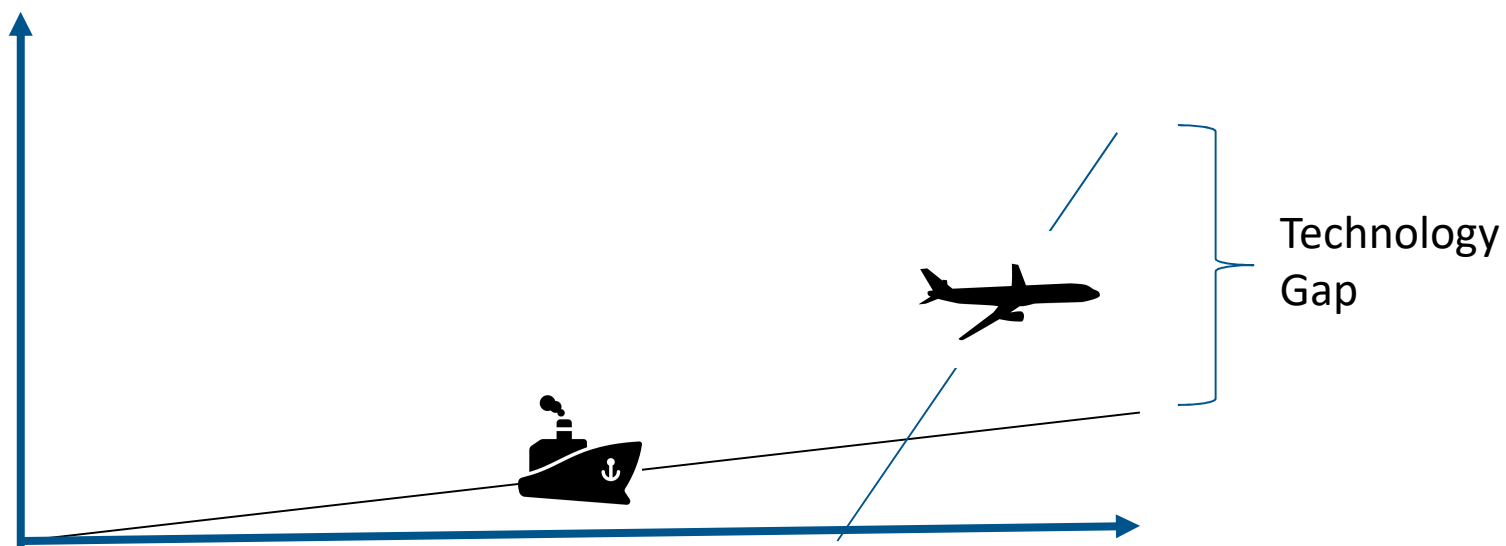

### Process or Project?

# Mind the Gap

The Maritime domain into the digital age

# What is e-Navigation

The IMO definition

“The harmonized collection, integration, exchange, presentation, analysis of maritime information on board and ashore by electronic means to enhance berth to berth navigation and related services, safety and security at sea, and protection of the marine environment”

## e-Banking

“The electronic payment system that enables customers of a bank or other financial institution to conduct a range of financial transactions through the financial institution's website. The online banking system will typically connect to or be part of the core banking system operated by a bank and is in contrast to branch banking which was the traditional way customers accessed banking services.”

# User friendly?

## e-Navigation – what does it take?

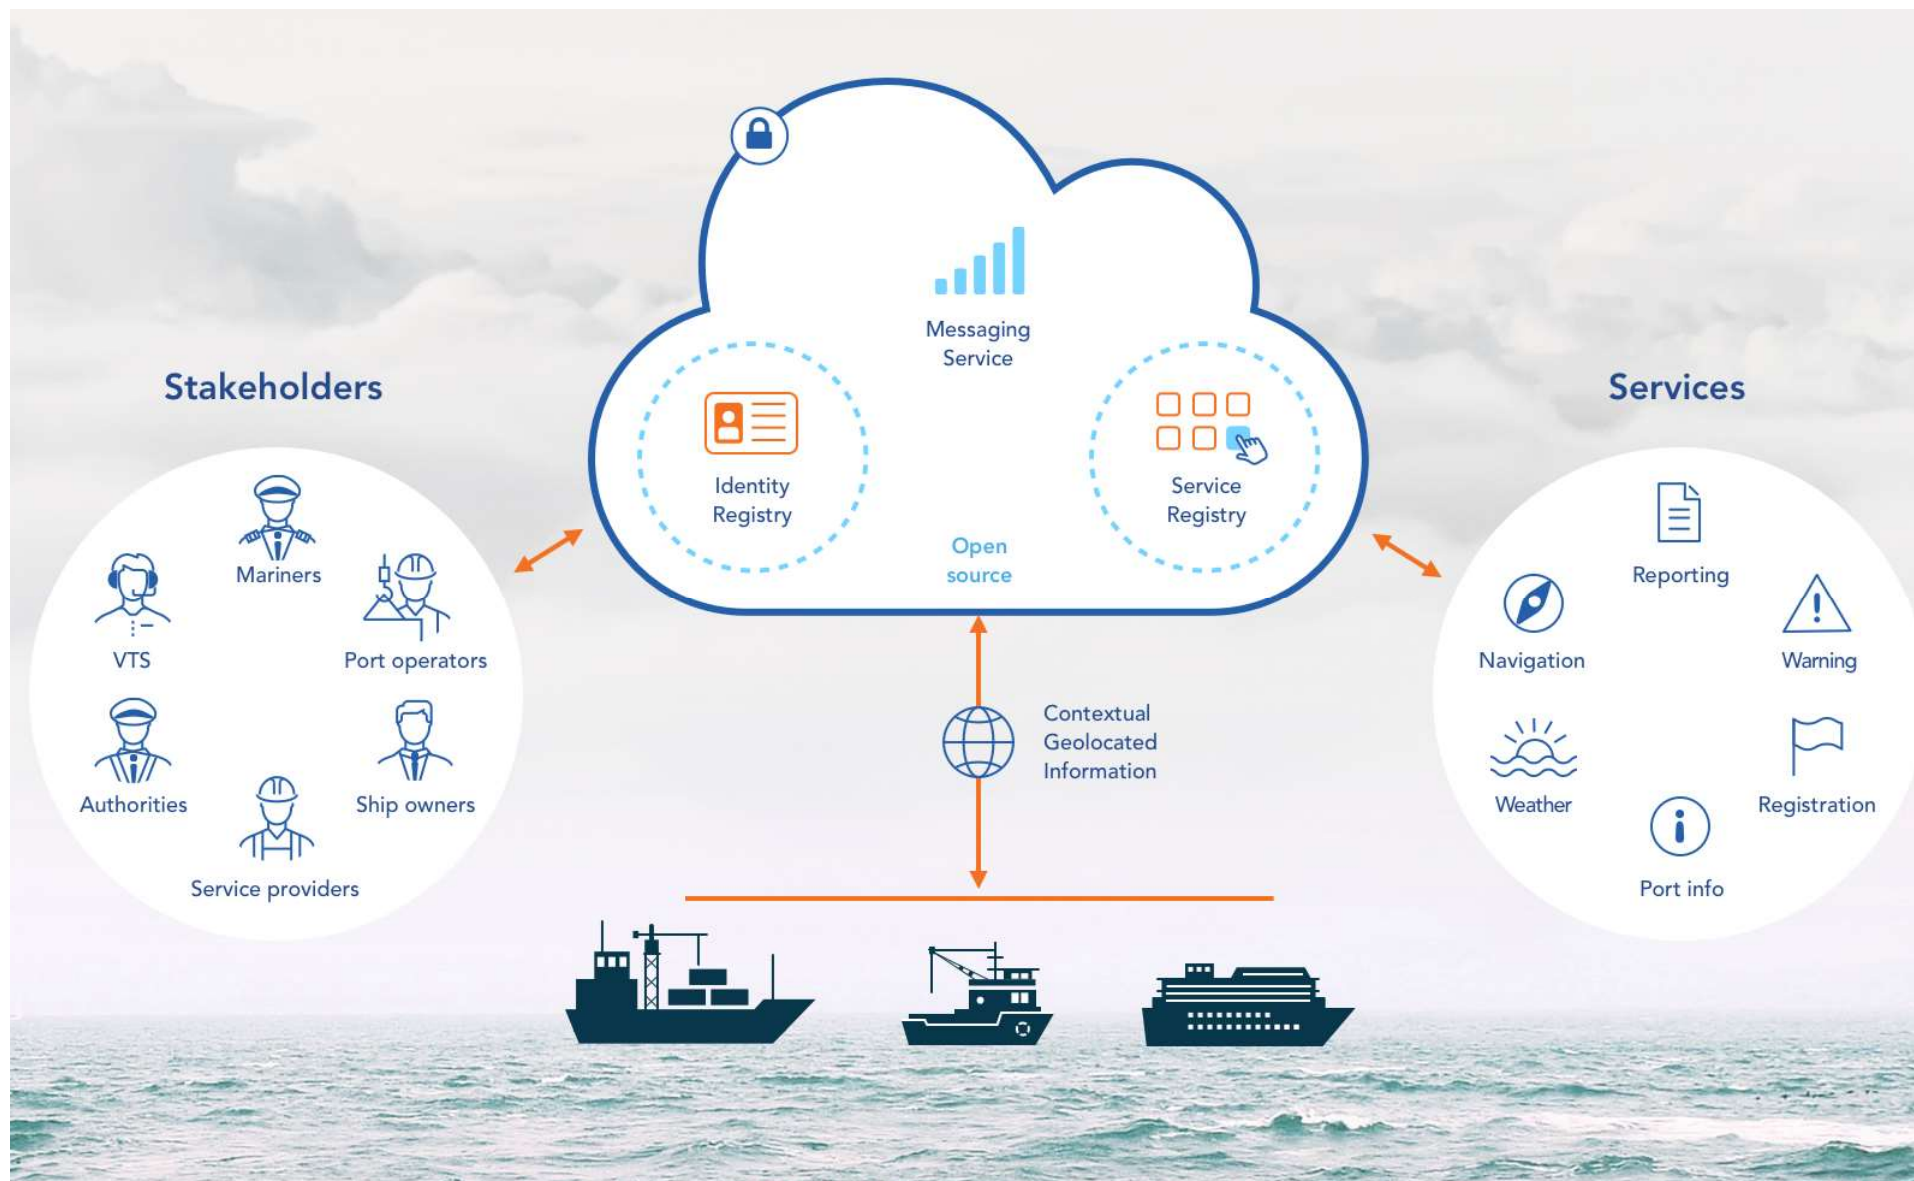

- Physical communication links
- Logical Infrastructure (for roaming etc.)
- Service providers

# The Maritime Cloud

(Identity and service portfolio management & roaming)

# The Connectivity Glue

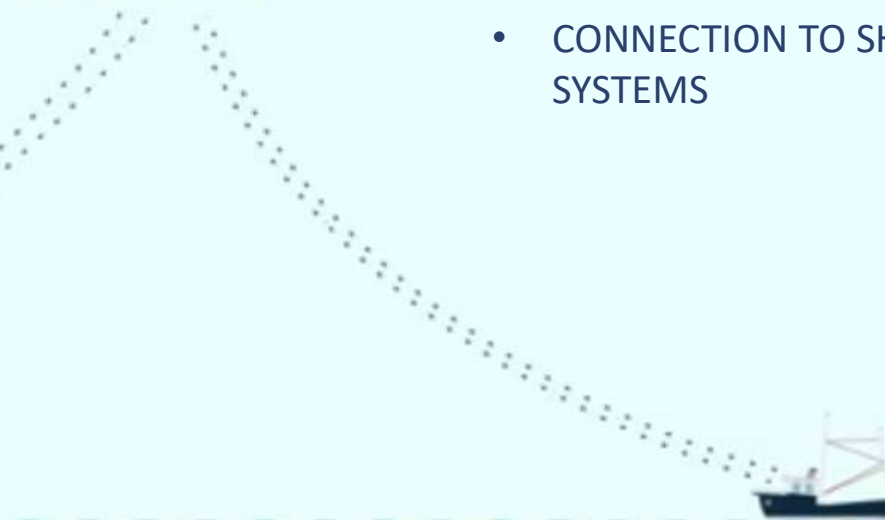

- VHF DATA EXCHANGE SYSTEMS

- AVAILABLE & EMERGING COMM. TECHNOLOGIES

- ROBUST, SEAMLESS & LOW COST ROAMING

- CONNECTION TO SHIP SYSTEMS

Thank you
