

Final Conference

T2.4 Shipboard System Integration, Onboard networks

This project has received funding from The European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement no. 636329

Contents

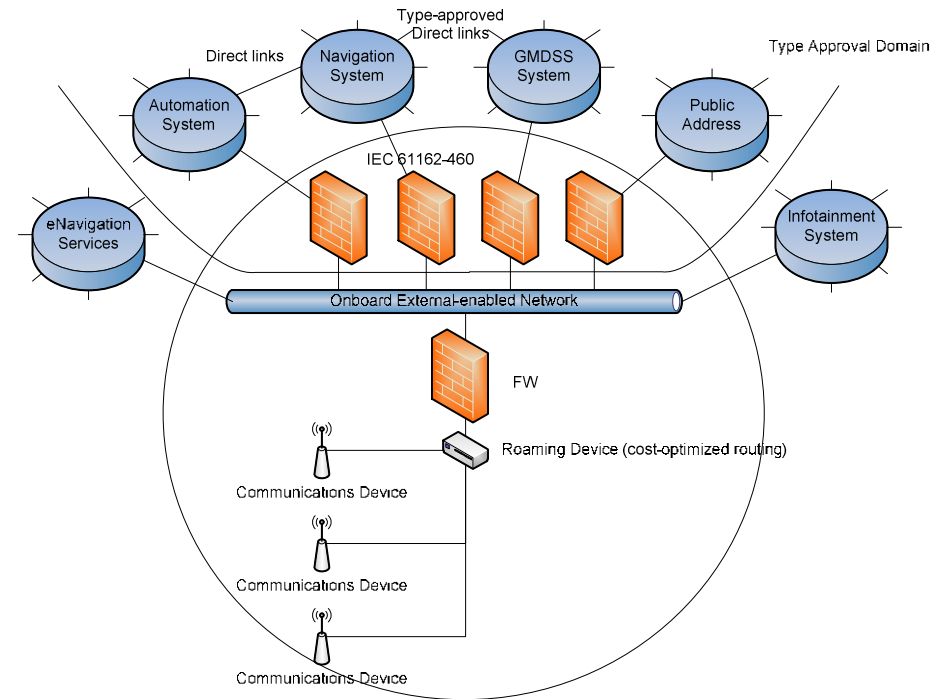

WÄRTSILÄ

- WP2 Task 2.4 Scope
- Summary of work so far
- Presentation of Prototype setup
- Learnings from prototype setup so far

Scope

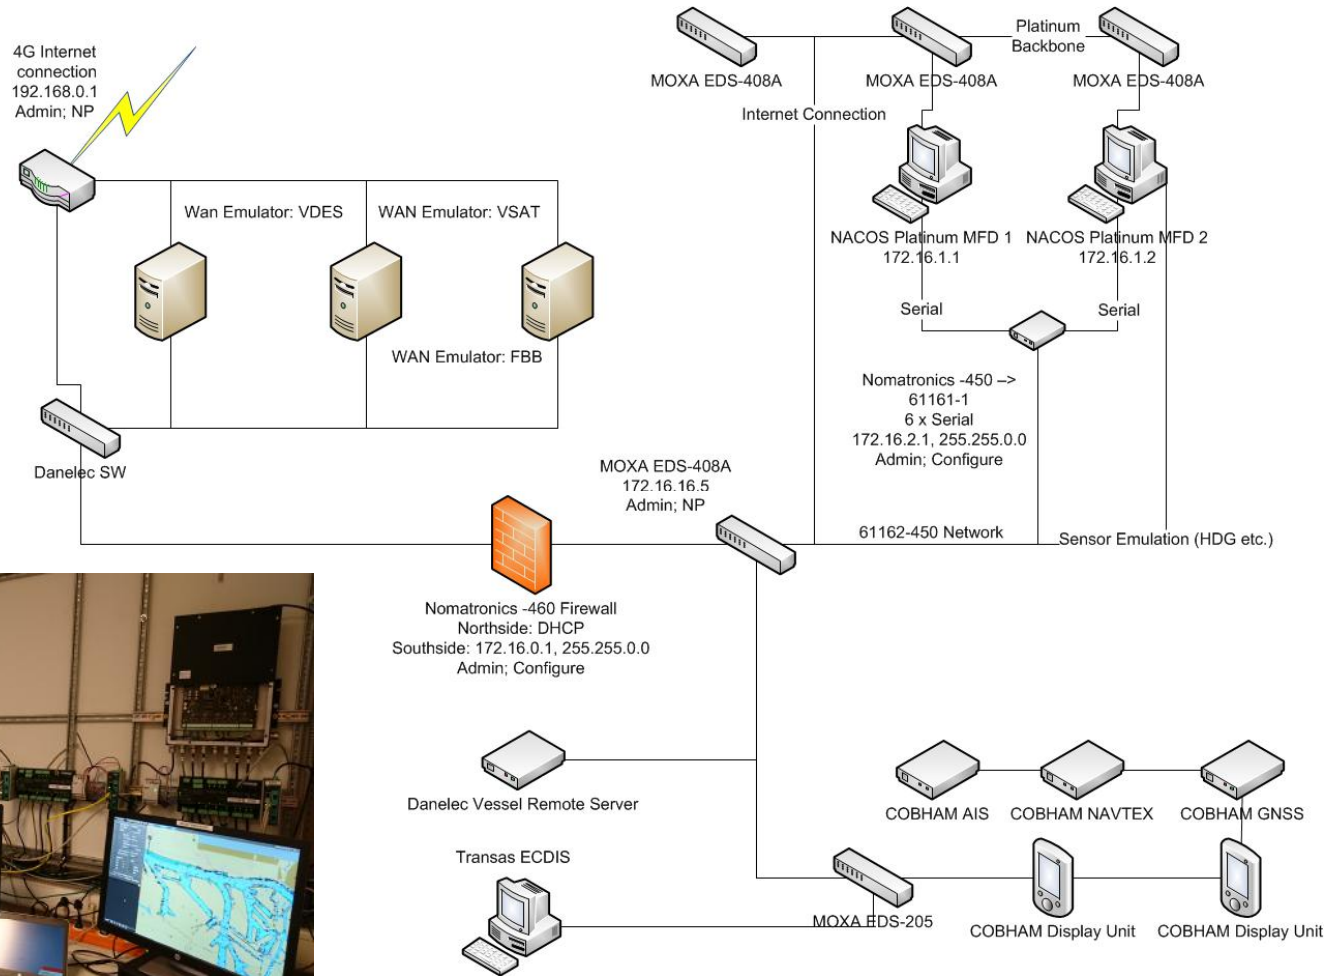

- Develop On-Board System Architecture
 - Low impact Integration with existing infrastructure and architecture
 - Requirement of an “open” and harmonized architecture
 - Cyber Security Considerations
- Vessel<->Shore communication protocols
- Prototype Demonstration & Potential Standardization

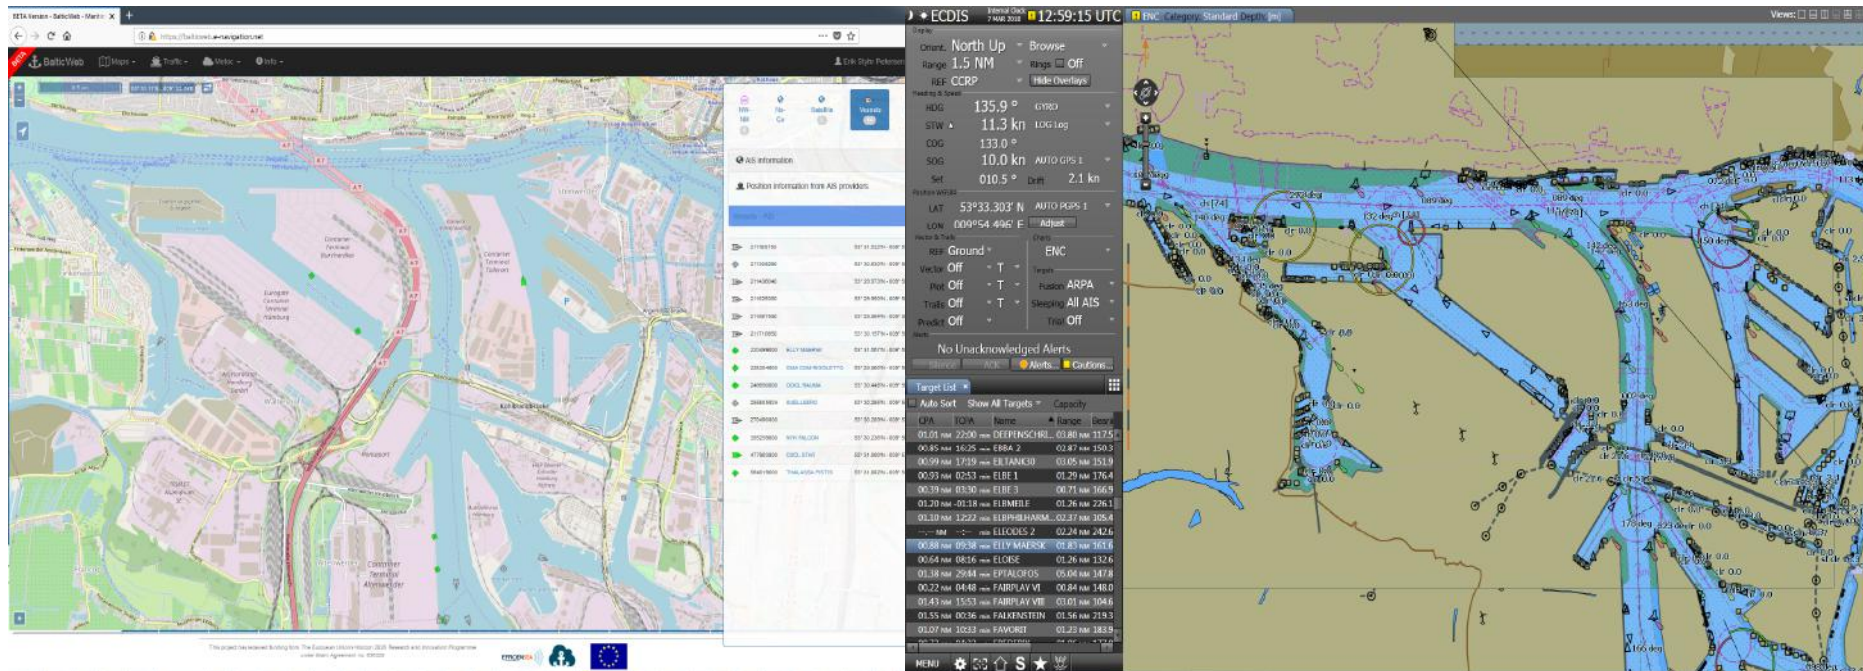

Prototype Setup at Wärtsilä, Hamburg

Wärtsilä

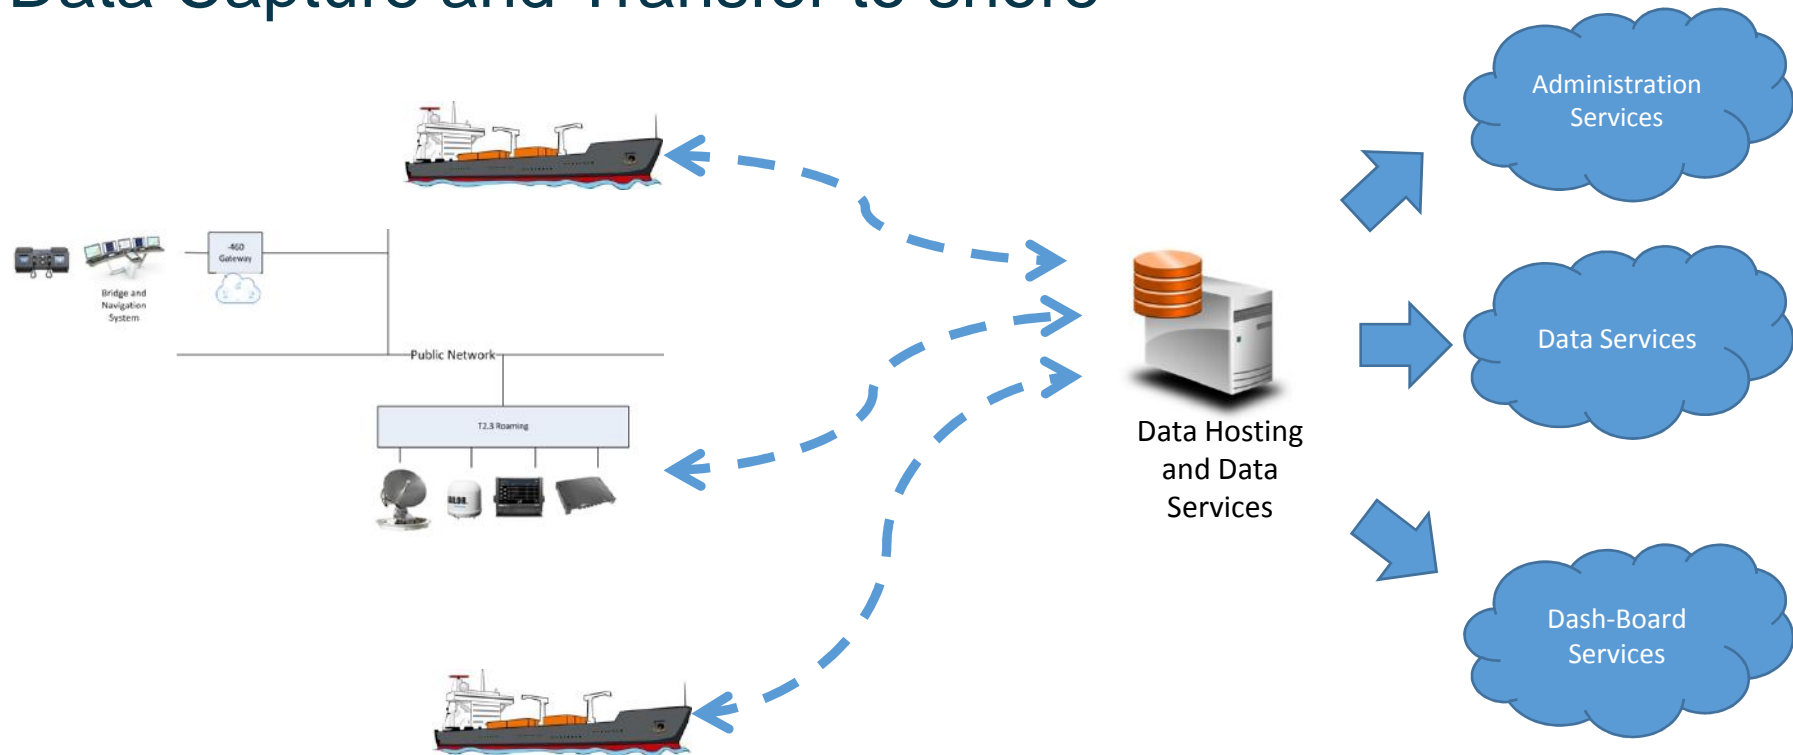

**The final test: Connected!!!
ECDIS & BalticWeb, side-by-side**

Danelec

Data Capture and Transfer to shore

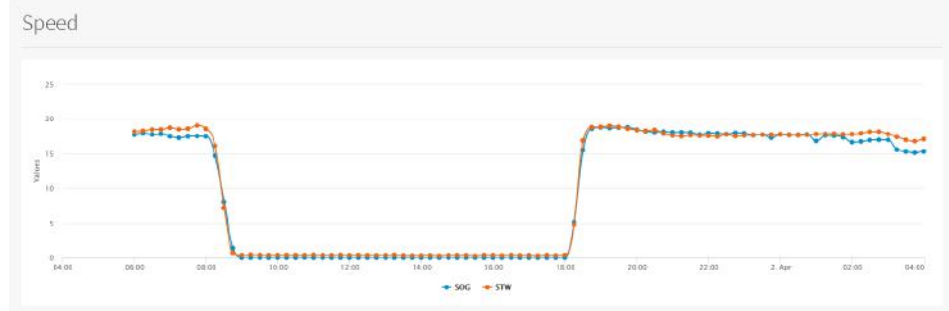

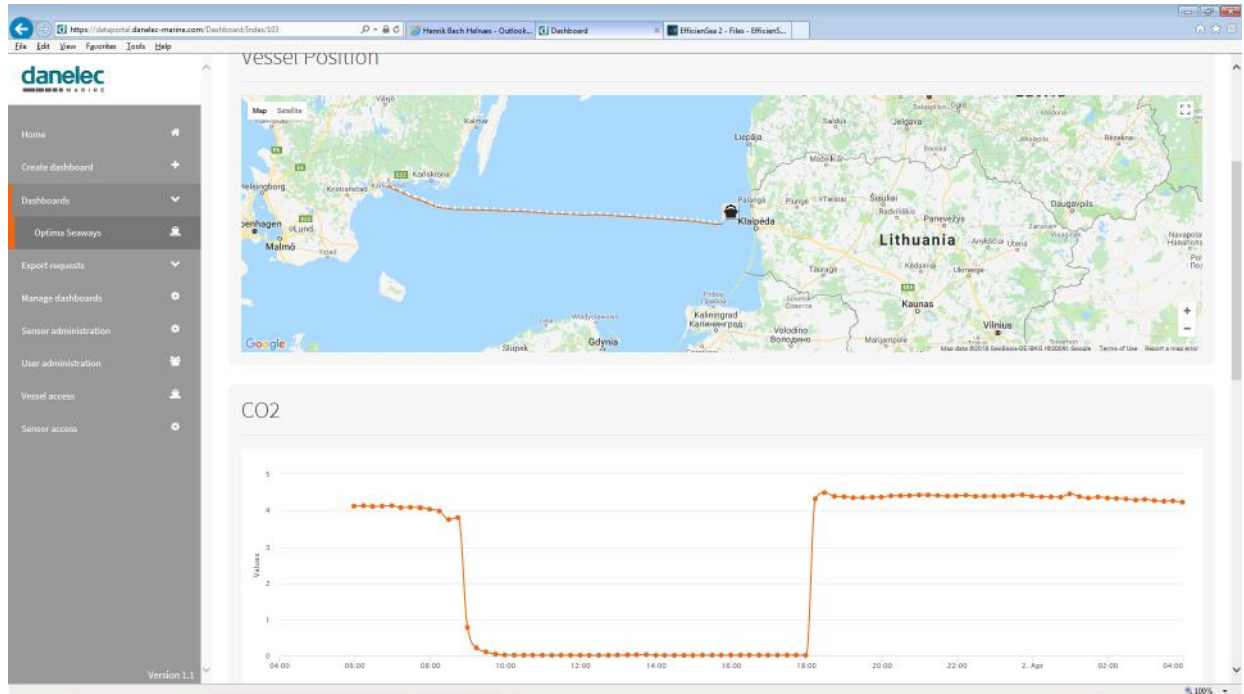

Danelec

Learnings:

- Works in architecture
- Reliable Communication Protocols at low bandwidth
- Interoperability
- MCP Ready

Cobham

- **Goals:**
 - Are providing sensors to provide data for the 450 network.
 - Show interoperability with other equipment on 450 network and In the architecture
 - Remote monitoring of performance of Cobham equipment through the architecture and the lower QoS situations

Transas: Summary of work

Commercial ECDIS software with the following additional functionality:

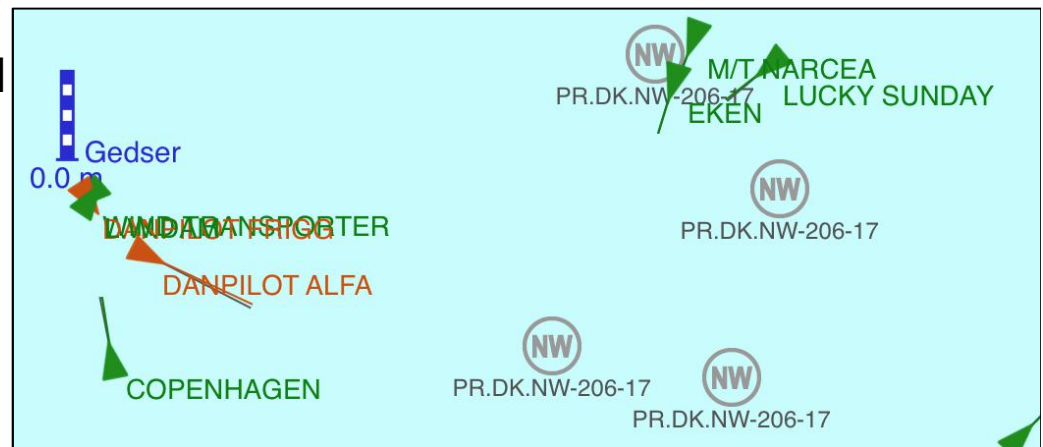

- **MCP**: Support of MSI service (S-124 format version 0.0.7)
- **MCP**: Support of Route Optimization service
- **MCP**: Support of Route exchange using RTZ format
- **MCP / STM-SeaSWIM**: Search of registered services. Ship Service book
- Supplementary: Weather and Satellite ice imaginary in GeoTIFF format

Prototype of new ECDIS generation:

- S101 charts: Waiting for Standard

New Pilots e-Nav PPU:

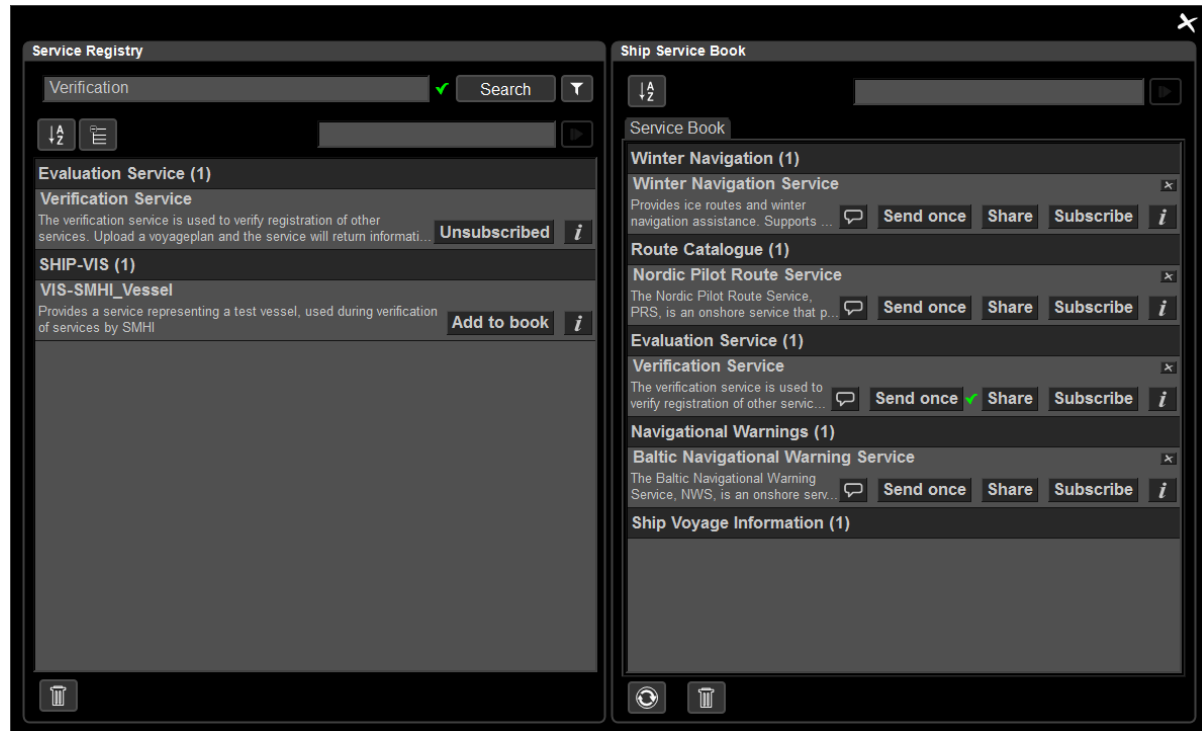

- RTZ Routes
- S-124 NW (MSI & NM)

Transas: Learnings

- **MCP & STM** services are accessible and operational
- Looking forward to the **New Era of Non-SOLAS e-NAV** tools
- **How to handle Cyber Security**
- Next e-Navigation trends and **needs**
- Future **commercialization**
- **IHO S-1xx Standards**

Fleet Operation Solutions, STC Solutions, Pilots PPU
